# FOGUIENG KAMGA JOSIAS

**Network & IT Security Technician | NOC & IT Support | No-Code Automation | Bilingual EN/FR**

Douala, Cameroon (remote, international) | +237 690 855 303 | josiaskamga01@gmail.com
linkedin.com/in/josiaskamga | josias-kamga.github.io/portfolio | github.com/Josias-Kamga
English (TOEFL iBT 90/120) | French (native)

## PROFESSIONAL SUMMARY

Bilingual (EN/FR) network and IT security technician who sets up, monitors and secures small-business networks. Hands-on with MikroTik, Cisco, Zabbix, The Dude and Proxmox/VMware lab environments, plus cybersecurity simulations with Tata Consultancy Services and Mastercard. I also build no-code automations (Airtable, Softr, Make, Zapier) and translate technical documentation between French and English. BTS graduate, now in a Bachelor in Systems, Networks & Cybersecurity. Available part-time (about 20 h/week), fully remote.

## CORE SKILLS

- **Network & NOC:** MikroTik RouterOS, Cisco (CLI, routing, switching), VLAN, DHCP, DNS, VPN, TCP/IP, Wi-Fi hotspot and captive portal, Zabbix, The Dude, Wireshark
- **Security:** firewall rules, IDS/IPS, Nmap, vulnerability assessment, incident analysis, IAM fundamentals
- **Systems & Virtualization:** Linux (Ubuntu, Kali), Windows Server, Proxmox VE, VMware vSphere/Workstation, VirtualBox, remote support
- **No-Code & Automation:** Airtable, Softr, Make, Zapier
- **Languages & Documentation:** English/French bilingual, technical translation, IT documentation, AI data annotation (certification in progress)

## EXPERIENCE

**Network & Systems Intern: Afrikaans Tech & Logistics** | Summer 2025
- Configured Cisco and MikroTik equipment: static addressing, routing, switching, remote access and device resets
- Learned structured hardware troubleshooting and the basics of fiber optics
- Delivered an end-of-internship project, a MikroTik captive portal with network monitoring (see Projects), with a defense and a written report

**Independent IT Support** | Douala, Cameroon | Ongoing
- Diagnose and repair hardware and software issues for about 10 users, including classmates and peers
- Offer remote support, no-code automation and FR/EN technical translation to international clients

## SELECTED PROJECTS

**MikroTik Captive Portal & Network Monitoring** (capstone, real-conditions deployment)
- Deployed a secure Wi-Fi captive portal on a MikroTik router with RADIUS-based user authentication and a custom login page
- Mapped network traffic and set up real-time alerts with The Dude, running on a virtual RouterOS CHR

**SME Network Monitoring with Zabbix**
- Designed a monitoring setup meant to detect failures before they reach users

**Administrative Automation with Airtable + Softr (no-code)**
- Built a business database and web portal to replace repetitive manual data entry, connected to other tools through Make/Zapier

**Firewall, IDS/IPS & VLAN Segmentation Lab**
- Enforced strict filtering rules, isolated traffic by VLAN and configured IDS/IPS in virtualized test environments (Proxmox VE, VMware, VirtualBox)

## EDUCATION & CERTIFICATIONS

- **Bachelor in Systems, Networks & Cybersecurity Administration** (Level III, in progress): Institut Universitaire de la Côte (IUC), Douala
- **BTS in Network & IT Security** (obtained): IUC, Douala, 2024-2026
- **Cybersecurity Analyst Job Simulation**: Tata Consultancy Services (via Forage), April 2026. Incident analysis, IAM-focused consulting recommendations
- **Cybersecurity Virtual Experience**: Mastercard (via Forage), November 2025. Threat analysis, transaction security, compliance
- **No-Code Technologies Certificate**: Orange Digital Center, July 2026
- **TOEFL iBT**: 90/120 | **Huawei HCIA-Datacom**: in progress

## INTERESTS

Competitive middle-distance running (800 m, 1500 m), which builds discipline and focus under pressure. Daily tech and threat-intelligence watch.
